Professional Summary

Artificial Intelligence graduate with hands-on experience in Python development, AI-based applications, and chatbot development, alongside professional experience in accounting operations and client coordination. Experienced in using Zoho Books for invoice management, tracking receivables and payables, recording expenses, and preparing monthly revenue reports. Strong analytical and problem-solving skills, with a practical approach to managing data, maintaining accurate records, and supporting day-to-day business operations. A quick learner, eager to acquire new skills, adapt to emerging technologies, and apply knowledge to real-world challenges while continuously growing professionally.

Education

Bachelor of Science in Artificial Intelligence (BS AI) September 2026
University of Central Punjab, Lahore, Pakistan
October 2022 – September 2026 | Degree completed

FSc Pre-Engineering
Government College Gulberg, Lahore, Pakistan
August 2020 – August 2022

Professional Experience

Accounts Executive – Indigo Tech Solutions May 2026 – October 2026
Accounts Management | International Client: Central Fleet, Canada

- Managed accounting operations for Central Fleet, a Canadian client, using Zoho Books to track accounts receivable and payable, customer invoices, supplier bills, and operating expenses.
- Prepared monthly revenue and expense reports, monitored outstanding payments, supported account reconciliations, and maintained accurate financial records for reporting and account management.

Intern – MCB Bank September 2025 – October 2025
On-site

- Gained exposure to network and VoIP integration, database administration, and business technology operations.
- Observed cross-functional workflows and gained familiarity with IT processes and HR-related operations.

Agentic AI Engineer Intern – Cartlow May 2025 – June 2025
On-site

- Worked with agentic AI concepts and chatbot development activities.
- Explored AI-enabled conversational workflows and practical chatbot use cases.

AI Intern – CodeAlpha September 2024 – October 2024
Remote

- Worked on Python-based software development tasks, including applications using Tkinter.
- Applied programming and problem-solving skills while developing and testing software features.

Sales Representative (Truck Dispatch) – Indigo Tech Solution June 2024 – August 2024
On-site

- Handled client communications and supported efforts to secure consistent load contracts.
- Coordinated sales follow-ups and maintained professional communication with prospective customers.

Selected Projects

StreetFresh – AI-Enabled Produce Marketplace: Marketplace concept for connecting customers with produce vendors.

Qyra Booking Application: Application project involving booking-agent workflows.

Music Recommendation System: Python-based recommendation project.

Movie Recommendation System: Recommendation project applying data structures and algorithms.

Climate Change Chatbot: Chatbot developed using a climate change dataset.

Language Translator Tool: Python application using the Google API.

Machine Learning Model with Streamlit: Iris dataset model training and interactive demonstration.

YOLOv8 Gesture Control Calculator: Computer vision project for gesture-based calculator interaction.

AI-Powered Garments E-commerce Website: Developed a modern, customer-focused online clothing store with an AI-powered admin panel for streamlined product and store management.

Certifications

- Large Language Models – Google Cloud, August 2024.
- NIST Cybersecurity Framework (CSF) Foundation – Alison, February 2024.
- Responsible AI: Applying AI Principles with Google Cloud – Google Cloud Training, March 2025.
- National Financial Literacy Program for Youth – State Bank of Pakistan, April 2025.
- Certified Artificial Intelligence Engineer – CodeAlpha, September 2024.
